

SHADELITE SUNSCREENS

Shadelite Ellipsoid Screens

www.cvsgroup.com.au

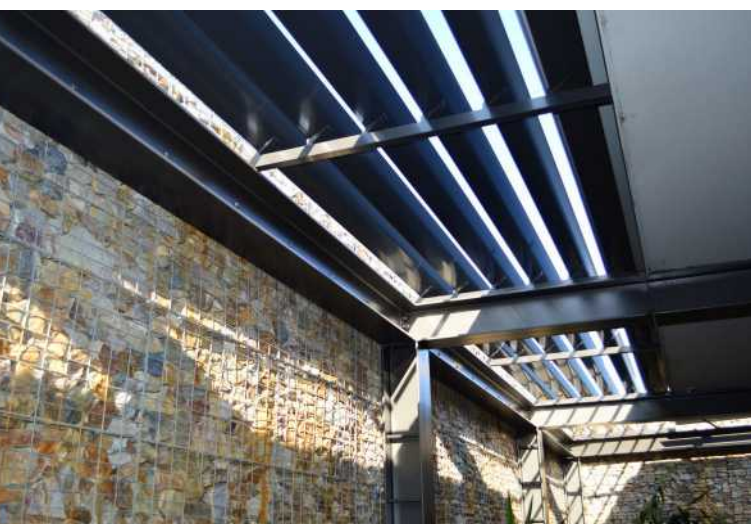

CVS Shadelite Ellipsoid Screens are an efficient and effective way to shade and deflect direct sunlight and to control heat.

CVS Shadelite Ellipsoid Screens can be manufactured as operable or fixed and they can be installed either horizontally or vertically. They can be easily connected directly to building structures or cantilevered with outrigger supports as continuous sunscreens.

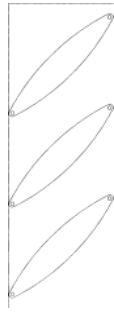

Most common uses for CVS Shadelite Ellipsoid Screens are:

- Horizontal Canopy Shades
- Privacy Screens
- Interior Mechanical Ventilation Grilles
- Vertical Feature Screens
- Operable Weather screens
- Security Screens

CVS Shadelite Ellipsoid Screens can be coated in a range of different finishes to suite specific requirements, including warranty and custom colour powder coat through to bright coloured anodising.
